Gender: Male **Date of birth:** 13/07/2008 **Place of birth:** Porto, Portugal **Nationality:** Portuguese

ABOUT ME

I am a 12th-grade student at Escola Fontes Pereira de Melo, in the Programming Course wich is an Professional Course. In addition to my studies, I actively participate in the “Ciências Vivas nas Escolas” club, where I apply my technical knowledge in programming.

I began learning programming during 9th grade, which led me to pursue the field in secondary school. I have experience in the following programming languages:

- C – Studied throughout 10th grade
- Java – Learned during 11th grade
- HTML/CSS – Learned during 11th grade
- Python – Learning now in 12th grade but did an extracurricular course

As part of the club, I have already assembled Adeept robots using Raspberry Pi, and, together with two classmates, we developed a small application that uses an API to capture voice input via a microphone and respond through an AI model. We plan to train a model that will later control the robot’s movement with voice commands.

I am familiar with Raspberry Pi devices and their operating systems, as we use them frequently in class, particularly in network-related tasks.

I completed an IT internship at CEiiA, where I gained hands-on experience in real-world IT environments and teamwork dynamics and also got to explore and learn more about hardware.

I consider myself fluent in English, with strong skills in reading, writing, and oral communication. Also I am an motivated and responsible individual who is eager to learn, help others, and grow both personally and professionally.
